Dear AP Computer Science Principles students:

Over the course of the summer please take the time to prepare for the year by memorizing the attached terms. If you commit to memorizing 15 terms a week you will have them all by the start of school. In addition, please use the links below in order to access some lessons on programming. Some of the lessons are short and some can be quite long, so do it at your own pace. You will not finish all of the lessons over the summer, which is fine. You should be able to do 2 to 3 lessons in an hour. Plan on spending two hours a week; one hour for memorizing and one hour for code. I look forward to meeting you in the fall.

In Christ,

Mr. Lucas
